ABOUT CISO ASSURANCE GLOBAL

CISO Assurance was founded in Europe in 2018. Our team of experts have a proven track record of delivering quality outcomes and demonstrating thought leadership in Information Security, for over 25 years.

At CISO Assurance Global, we believe in a new-age working environment. Old-fashioned hierarchies are relics of the past. Our growing team consists of individuals from all over the world.

Not only do we love to work with different cultures, genders, and ages, but we also support the idea of providing as much flexibility as possible. We are committed to encouraging our team members to achieve their personal and professional goals.

Working with us is very likely to be different than with your previous employers. While you have your given duties, we love to see you bringing in your own ideas and suggestions. We encourage proactive leadership in all roles.

WHAT ARE WE LOOKING FOR ?

We are seeking an experienced Software Developer to join our team.

The ideal candidate will have excellent programming skills front-end and back-end, and experience with development and maintenance of software applications.

Expertise in utilizing ChatGPT (or similar) is essential, as we embrace AI technology to help our business grow rapidly.

WHAT ARE THE BENEFITS OF WORKING WITH US?

We are a team of open-minded people, who share the same vision of creating a better world, by protecting our clients and their customer's data, from various digital threats. We support our team in every way possible.

We offer you a market-related salary, depending on your experience and qualifications.

You have the flexibility to work from home, with only occasional team building events to join.

If you are interested, we are happy to receive your application at info@cisoag.com including your CV, letter of application, and certifications related to this position.
